

The latest in misting fans, new to Australia

The outdoors during summer months are always the preferred place to relax, entertain, dine, and recharge though we are often forced inside when it becomes too hot. With Mist360 misting fans you are able to create a comfortable outdoor atmosphere to enjoying the summer months.

Creating 360 degrees of cool air where it is easily installed. The forced air flow and the Ruby-orifice nozzles provide 100% evaporation of mist throughout the changing condition of the day.

The most powerful electric heater in Australia

Whether you need to heat a small or large inner courtyard, or a street frontage in variable conditions, Alfresco Spaces can supply our Architectural Series electric radiant outdoor heaters in the perfect size to provide heating coverage to any public dining, recreation or residential area. Our Architectural Series are electric outdoor heaters that are manufactured using Australian Marine Grade 316 Stainless Steel. This means they provide outstanding environmental resilience and longevity in any climate. There are five sizes in the Architectural Series of outdoor heaters, providing thermal coverage of up to 16 square metres.
